### THE SPACE INVADERS ARE COMING!

Waves of invaders sweep down the screen towards the player's base. The invaders rain missiles down upon the fortresses and at the player's tank. The only defence, is to destroy the invaders.

### THE SPACE INVADERS MUST BE ELIMINATED!

Space invaders is incorporated in a cocktail table, with an adjustable stand, for ease of comfort and maintenance. The tempered glass top reduces the possibility of spilled liquid entering the cabinet. The attractive wood veneer cabinet permits the cocktail table to blend with most surroundings.

---

SPACE INVADERS, a space adventure game distributed by LEISURE AND ALLIED INDUSTRIES.

---

This manual is presented as an aid for owner/operators. To assist in using the manual it has been divided into three main sections:

- A.** SERVICE INSTRUCTIONS

GENERAL

## INSTALLATION

2

### INITIAL INSPECTION

On receiving the SPACE INVADER examine it for any damage that may have been caused during transportation, such as broken panels, cracked glass table top or missing controls.

After having inspected the machine for any signs of damage to the exterior, an internal inspection is required.

Lift the hinged table top and lock the support arm in position.

Visually inspect the interior, searching for any indications of misplaced equipment. Is the power supply board, the monitor, PC BOARDS in position?

NOTE: If any equipment is misplaced contact your nearest LEISURE AND ALLIED OFFICE and DO NOT CONNECT TO MAINS POWER SUPPLY.

Ensure that the PC BOARDS and their respective connectors are all firmly in place.

Inspect all fuse holders and replace any broken or missing fuses with the appropriate fuse. (REFER to SECTION B - PARTS CATALOGUE.)

The operator/owner's keys are located inside the machine, next to the coin mechanism, attached onto a hook.

After successful completion of the initial inspection release the support arm and lower the table top into position. Lock the table top and cash box with the keys provided.

INSTALLATIONPOSITIONING

To assist in achieving the optimum life from the SPACE INVADER there are a number of DO'S and DO NOT'S to be followed during installation.

DO NOT handle the machine roughly as this may cause damage.

DO NOT install the machine outdoors.

DO NOT install the machine where it will hamper the use of emergency exits or equipment.

E.G. Avoid installing in front of fire exits or fire protection equipment.

AVOID installing where direct sunlight may fall upon the machine.

AVOID installing where dust accumulates.

AVOID installing in moist or humid places.

fig.3

## INSTALLATION

2

- DO install indoors.
- DO install on a solid flat surface without undue movement or vibration
- ALLOW sufficient space opposite the control panels, for players.
- ADJUST the stand of the cocktail table to a suitable height for operation (REFER - SECTION B - PARTS CATALOGUE - Adjustable Stand.)
- ARRANGE the mains cord so as not to hinder the movement of players.

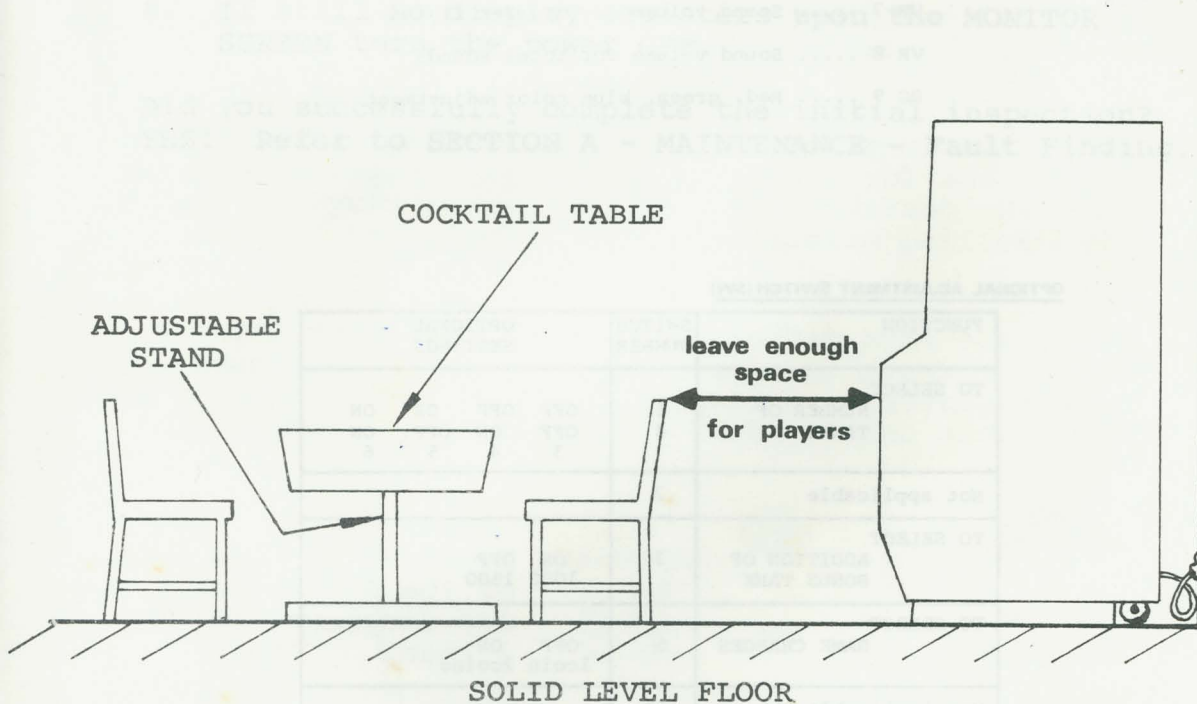

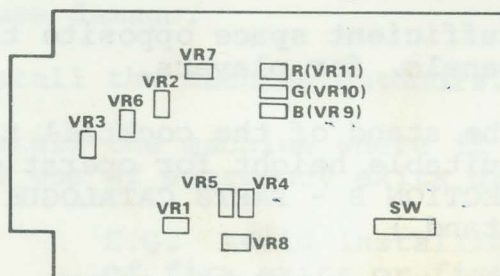

fig.4

INSTALLATIONOPTIONAL ADJUSTMENTS

- VR 1 ..... Sound volume for beam explosion *WHEN HIT*  
 VR 2 ..... Sound volume for beam shooting  
 VR 3 ..... Sound volume for invader's disappearing  
 VR 4 ..... Sound volume for additional beam cannon  
 VR 5 ..... Sound volume for invader's marching  
 VR 6 ..... Sound volume for UFO explosion  
 VR 7 ..... Sound volume for invader flying  
 VR 8 ..... Sound volume for total sounds  
 VR 9 ..... Red, green, blue color adjustment

### SWITCHING ON

- | <u>STEPS</u> | <u>ACTION TAKEN</u>   |
|--------------|---|
| 1.           | Plug in the mains power cord.<br>Arrange the cord so it does not hinder the movement of players.  |
| 2.           | Turn the power ON.  |
| 3.           | After a few seconds the display should register upon the MONITOR SCREEN.                          |
| 4.           | If no display registers upon the MONITOR SCREEN turn the power OFF and ON and wait a few seconds. |
| 5.           | If no display registers repeat STEP 4 a few times.  |
| 6.           | If still no display registers upon the MONITOR SCREEN turn the power OFF.                         |

Did you successfully complete the initial inspection?  
YES! Refer to SECTION A - MAINTENANCE - Fault Finding.

# 3

## HOW TO PLAY

1. Insert coin(s).

2. Push one player   
or  
two player   
selection button as  
desired to commence.

3. Use the control lever to  
move your tank across  
the screen to the right  
or to the left.

4. Push the firing button  
when you wish to destroy  
an invader.

5. If the player's tank is  
hit by an invader's  
missile it is destroyed  
and the next tank  
becomes available.

6. The player may hide  
behind the fortresses  
to evade destruction  
from falling missiles.

7. There are four different  
types of space invaders.  
Each registers a different  
value when destroyed.

50 100  
150 300

30

20

10

8. As the number of enemy  
invaders decrease, the  
remainder move faster  
to avoid the player's  
missiles.

9. If all the space in-  
vaders are destroyed  
the game resets. Now  
a new more difficult  
pattern of invaders  
appears to test the  
player's skill.

10. After a player achieves  
a certain score (REF.  
INSTALLATION - Optional  
Adjustments) an extra  
tank is awarded.

11. If all the player's  
tanks are destroyed,  
or the invaders overrun  
the fortresses, or the  
player's time is exhaus-  
ted, the game is over.

12. When two players are  
participating and the  
first player's tank is  
destroyed, the game  
resets for the second  
player to commence.  
Alternating between  
players continues until  
the destruction of both  
player's tanks.

13. The five highest scores  
of the day are recorded  
and displayed on the  
screen.

## HOW TO PLAY

### MONITOR SCREEN DISPLAY

### FIVE HI SCORE DISPLAY

fig.6

MAINTENANCEPRIMARY

1. Inspect your machine daily to ascertain if a fault may have occurred since the previous inspection.
2. Wipe clean the exterior of your machine weekly to prevent accumulation of dust and grime. The exterior of the machine may be cleaned with any non-abrasive household cleaners.

BASIC FAULT FIXING

1. If the monitor screen lights up but no image appears.

Ensure that the PC BOARDS are plugged in firmly.

2. If the image shifts to the side, this may be caused by a strong magnetic field close to the machine.

Remove the source of magnetic interference.

Further adjustments to the display may be attempted by use of the ADJUSTMENT KNOBS situated on the MONITOR. (Refer to SECTION A-MAINTENANCE - Maintenance Adjustment Diagram.)

3. If the sound is too high or too low.

Adjustment is by the volume control knobs situated inside the machine (Refer to SECTION A-MAINTENANCE - Maintenance Adjustment Diagram.)

4. If a coin cannot be inserted.  
Perhaps the coin box is full, or the coin may be jammed.

Push the reject button, under normal circumstances the coin is refunded.

Attempt to dislodge the jammed coin.

5. If a fault develops during a game.

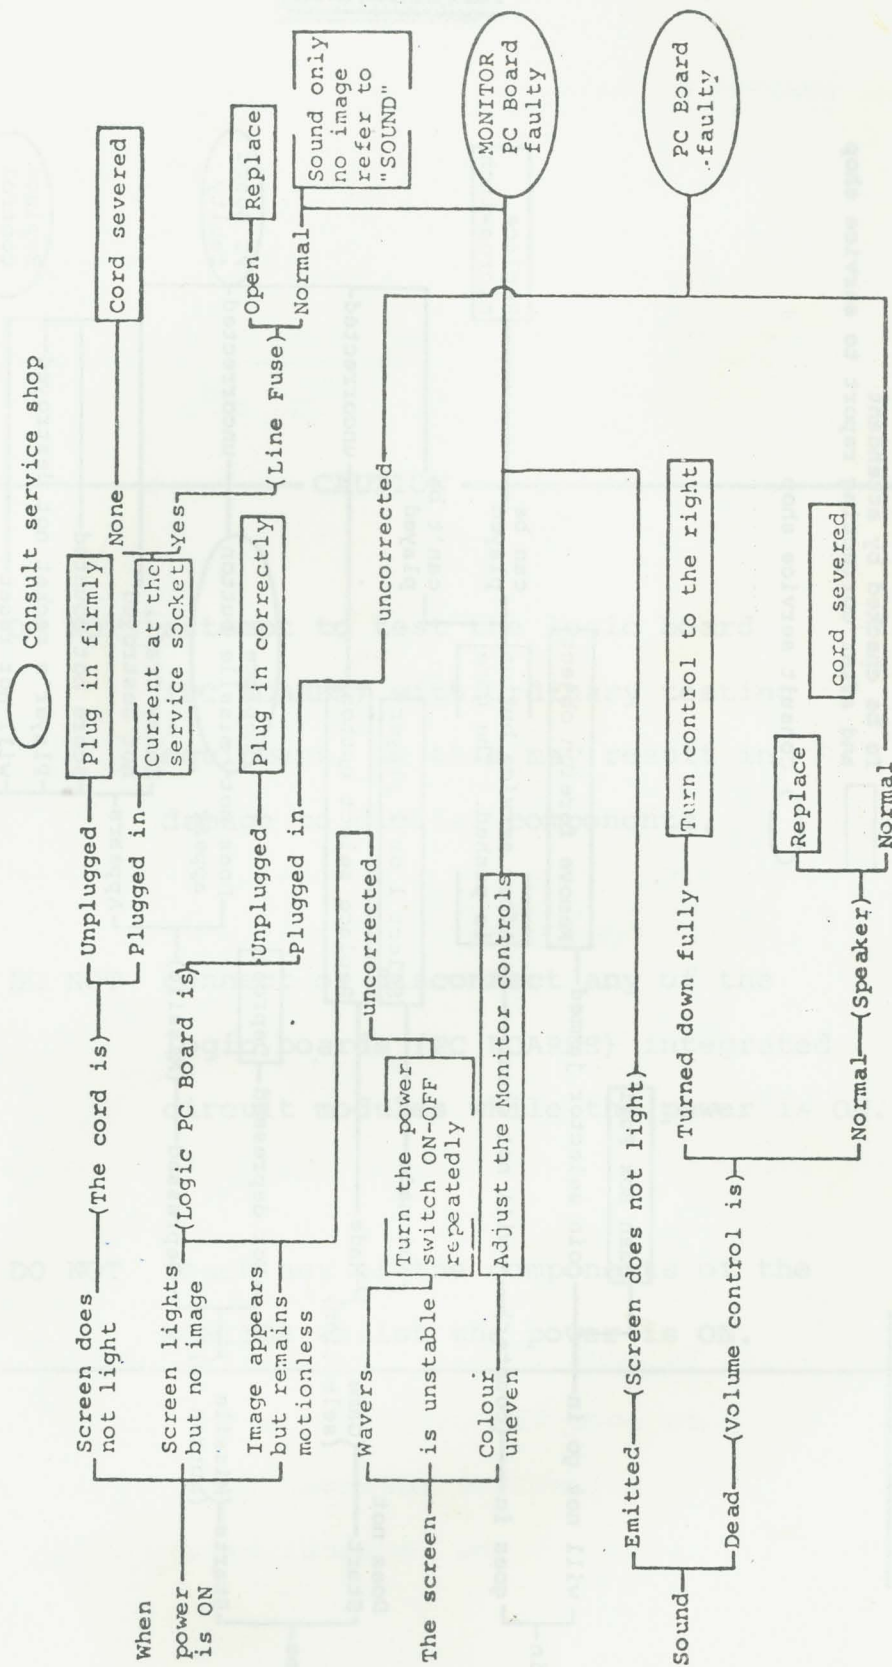

TURN THE POWER OFF and refer to the Fault Finding Charts.

NOTE: For problems of greater complexity refer to SECTION C - TECHNICAL DETAILS or consult your nearest LEISURE AND ALLIED INDUSTRIES Office.

# FAULT FINDING CHART

## MAINTENANCE

To be checked by the attendant and after correcting, report to service shop  
Consult service shop

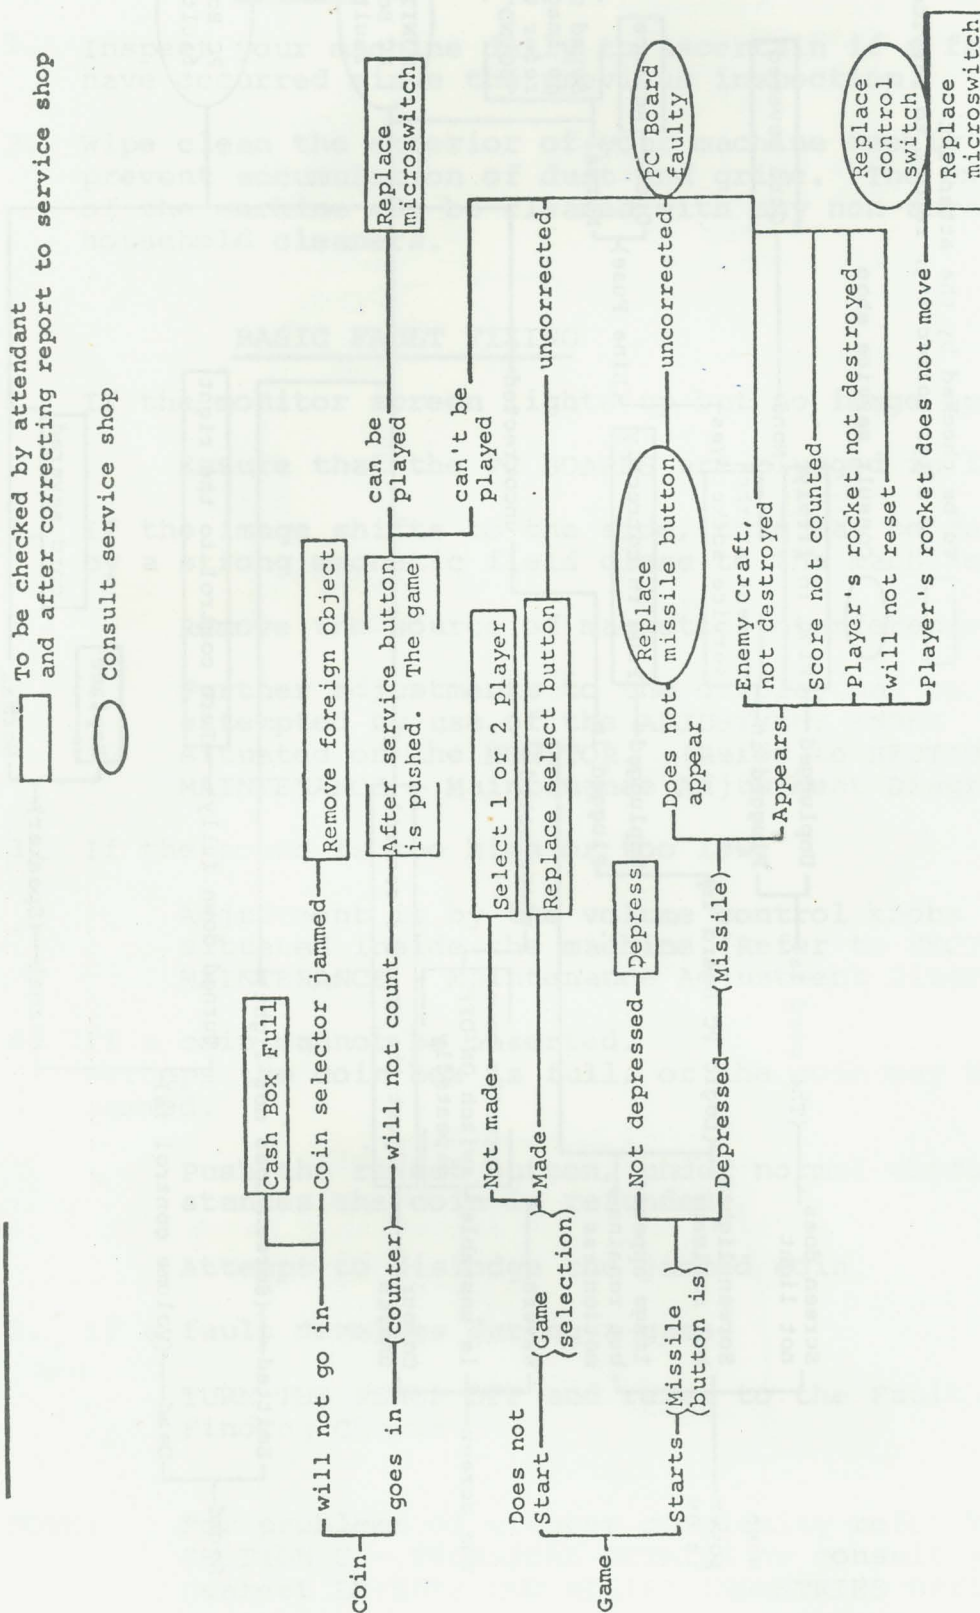

## MAINTENANCE

## MAINTENANCE

## FAULT' FINDING CHART

CAUTION

DO NOT attempt to test the logic board (PC BOARDS) with ordinary testing equipment, as this may result in damage to digital components.

DO NOT connect or disconnect any of the logic boards (PC BOARDS) integrated circuit modules while the power is ON.

DO NOT touch any of the components of the MONITOR whilst the power is ON.

MONITOR P C BOARD ADJUSTMENT

- VR 104 ..... To adjust the brightness of the monitor display
- VR 401 ..... To prevent the display from streaming, up or down
- VR 501 ..... To adjust the skew strips of the monitor display
- VR 402 ..... To move the display up or down
- VR 502 ..... To move the display right or left
- VR 403 ..... To adjust the horizontal width of the display
- L 502 ..... To adjust the vertical height of the display

## SECTION B

B

The materials presented on the opposite page refer to hardware items.

Hardware items listed on this page are those that may need replacement during the normal operational life of the machine. These items are highlighted in gray by the owner/operator. Replacing the replacement of hardware items requires the use of tools (e.g. screw driver, Phillips head screw driver, etc.) and a screwdriver.

The parts listed on this page are for the machine and are not for the machine.

The purpose of this section is to provide the owner/operator with the necessary information for ordering replacement parts.

When ordering parts give the part number, part name, machine and game type. This will help to avoid confusion and error in your order.

fig. 8

PARTS CATALOGUEHARDWARE

The numerals presented on the opposite page refer to hardware items.

Hardware cover those items that may need replacement during the normal operational life of the machine. These items may be replaced in situ by the owner/operator. Generally the replacement of hardware items require the minimum of tools i.e. screw driver, phillip head screw driver, socket spanner and sockets.

The parts listed are obtainable from LEISURE AND ALLIED INDUSTRIES.

<u>Item</u>	<u>Part Number</u>	<u>Description</u>	<u>No. Per Unit</u>
1	GV0086	Hinge	2
2	GV0200	Fuse 1amp	3
